MORE PRODUCTION. LESS LABOR

Color Touch Screens Provide:

- Graphic images with easy-to-understand views of adjustments and timers
- Operators simply enter product name or code and pre-defined settings are automatically loaded from memory for optimal performance
- Help screens provide readily accessible information to the user on each displayed object
- Maintenance screens provide tools such as input/output monitors and manual cycle controls to simplify adjustments and troubleshooting

Arr-Tech Bag Sealers Feature:

- FDA-approved food contact surfaces
- Clean white powder-coated finish
- Servo-controlled continuous bag sealing motion
- Precision sealing head with temperature control
- Manual no-seal bi-pass function
- Automatic no-seal function for unbagged, over height or partial bagged stacks

Foam Compression:

- Exhausts any excess air from package prior to sealing and trimming
- Product freshness lasts longer without excess air trapped in the package

Optional Scrap Removal System:

- Mesh bag included
- Trimmed-off bag scraps are collected away from product line and contained for easy disposal

Specifications: Inline Bag Sealer

Production Rate:
Up to 60 bags per minute

Package Sizes:
Can range from 5" to 14" wide,
up to 4" in height

Useful For:

- Tortillas
- Pizza Crusts
- Flatbreads
- Pita Breads
- and More!
