To Arr-Tech Incorporated

We are happy to submit this testimonial letter regarding the Arr-Tech Genesis Servo Driven Flour Tortilla Counter Stackers.

We purchased four new Genesis Servo models in December of 2002. Our goal was to increase our production to meet our customer's needs and decrease our labor in our packaging area. These new counter stackers replaced older Arr-Tech counter stackers we were using on our flour lines. Since upgrading our counter stackers to the new Genesis Servo counter stackers we have been able to reduce our labor costs and increase our production rates. Our machines have been in operation since December of 2002 with little or no problems. The machines are user-friendly and operate effortlessly. Anytime we have called to ask for technical support, Arr-Tech has responded with professional quality service providing prompt support of their equipment.

I highly recommend Arr-Tech Genesis Servo counter stackers as their machines stand up to the vigorous and continuous usage we are putting them through.

Sincerely,
Dennis Johnson
